

# RIDGEWAY

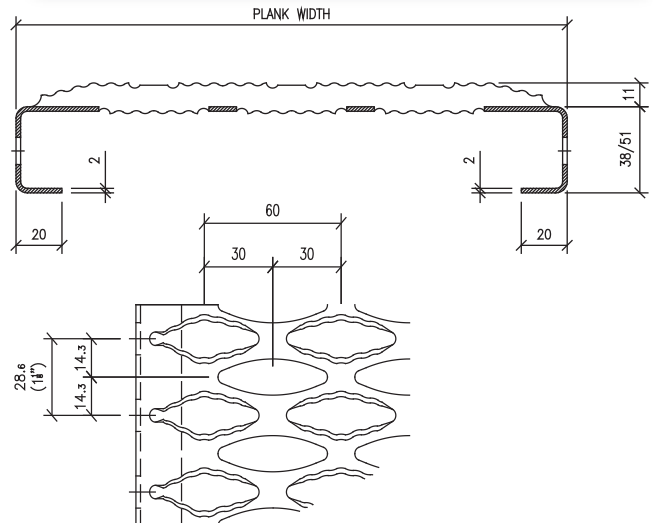

## USA SAFETY GRATING

Type USA is a highly aggressive grating, manufactured with a walking surface consisting of a high slip resistant open diamond pattern matrix. The diamond pattern has a serrated surface and load supporting continuous side flange.

Type USA gratings are designed to provide a safe walking surface where slippery substances could be part of the working environment. The design of the product can provide a high load capacity to suit modern engineering activities.

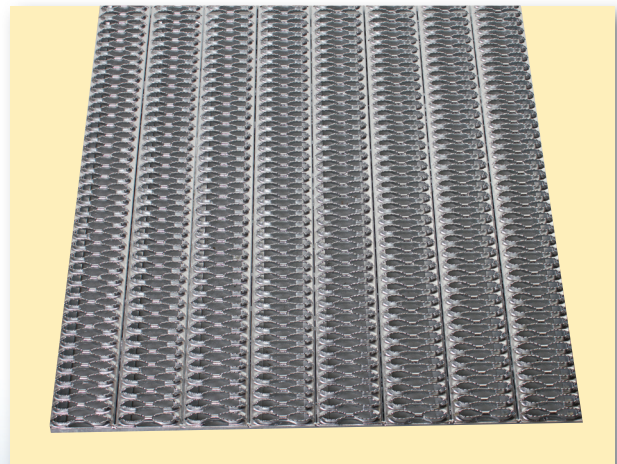

Mild Steel

Aluminium/Stainless Steel

Material:	Mild Steel Aluminium Stainless Steel
Thickness:	2mm Steel 3mm Aluminium
Height:	38 or 51mm
Widths:	See Table
Hole Size:	47mm x 15mm Nominally
Finish:	Self Colour Galvanised to BS EN 1461

Plank Width (mm)	Depth (mm)	Number of Holes	Length** (mm)	Mild Steel Weight (kg/m <sup>2</sup> )	Aluminium* Weight (kg/m <sup>2</sup> )
120	38/51	2	3048	40.5/43.2	17.5
180	38/51	3	3048	32.4/34.8	14.0
240	38/51	4	3048	28.8/30.6	12.5
300	38/51	5	3048	26.2/34.7	11.5
360	38/51	6	3048	24.8/26.1	11.0
420	38/51	7	3048	23.9/24.7	10.5

\*We are unable to offer 38mm deep in Aluminium. \*\*A length of 3658mm is available subject to stock availability.
