

B-CUBE® stair treads has a better strength-to-weight ratio than traditional mesh grating treads which means that strength is maintained while weight is reduced. B-CUBE® treads are manufactured with Oyster-surface between meshes for slip resistance. B-CUBE® stair treads are recommended in most constructions and industries especially where high air- and liquid flow are required.

Qualities

High strength-to-weight ratio

High air- and liquid flow

3 design variants

Enhanced slip resistance

Materials

Steel 240 YP	Mill finish - Hot dip galvanised
Steel Z275	Pre-galvanised
High-strength steel HSS420®	Mill finish - Hot dip galvanised

Technical data

Standard and norms	EN ISO 14122-3
Load capacity acc. to EN ISO 14122-2	1,5 kN / 100 x 100 mm

Dimensions

Length (L)	800	900	1000	1100	1200
Height (Ht)	40	40	40	70	70
Material thickness (Mt)	2	2	2	2	2

Width (Pw)	K			Weight			
240	4 CUBE-Oy	120	4,77	5,30	5,83	6,36	6,89
270	5 CUBE-Oy	150	5,15	5,73	6,30	6,88	7,45
305	6 CUBE-Oy	180	5,61	6,24	6,86	7,49	8,11

measurements in mm / weight in kg
